

Targets

Targray is your ideal partner for Thin Film PVD applications. With over twenty years experience catering to Thin Film deposition, our expertise will allow you to capture greater overall efficiency gains; ranging from superior target composition, design, optimization, delivery & recycling. We offer a variety of planar and rotatable (monolithic and bonded) targets catering to OEM lines and also custom lines. Through our knowledge and strategic global partnerships we can help you achieve your goals!

Overview:

PVD targets for Thin Film PV modules and ARC Si targets for Si cells:

- Targray offers targets for your thin film needs
- Targets for back contact, front contact and absorption layer
- Application specific or customer specific products available
- On demand fulfillment available!
- Recycling services also offered!

Capture improved supply and reduced cost through Targray's global infrastructure.

Planar Target Types:

- Aluminum
- Molybdenum
- Chromium
- Silicon
- AZO, ZnO
- ITO
- CdTe, CdS
- Please ask us for details on other materials...

Rotatable Target Types:

- Aluminum
- Molybdenum
- Si
- AZO
- Please ask us for details on other materials...

Bonding:

Targray offers bonding services along with backplates for your application. Please inquire into our bonding solutions and global network.
